

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class ColliderProxy {
        + OnTriggerEnter_Action
        + OnTriggerExit_Action
        - OnTriggerEnter()
        - OnTriggerExit()
    }
    ColliderProxy --|> MonoBehaviour
```

The diagram shows a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue arrow with a hollow triangular head points upwards from the 'ColliderProxy' class to the 'MonoBehaviour' class, indicating inheritance.
