

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class BeavirBusinesslogicViewE2EObj["Beavir.Businesslogic.View.E2EObj"] {
        + DestinationEnvironment
        - destinationEnvironment
        + OnTriggerEnter()
    }
    BeavirBusinesslogicViewE2EObj --|> MonoBehaviour
```

The diagram illustrates a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue arrow with an open triangular head points upwards from the 'Beavir.Businesslogic.View.E2EObj' class to the 'MonoBehaviour' class, indicating that 'Beavir.Businesslogic.View.E2EObj' inherits from 'MonoBehaviour'.

Beavir.Businesslogic.View.
E2EObj

+ DestinationEnvironment
- destinationEnvironment
+ OnTriggerEnter()
